

Technical Bulletin

NP01	Component Update Summary	SEBECO MOTORSPORT	
From:	Ben Cooper– Project Engineer, NP01		
Subject:	NP01 Update Summary	Date:	6/4/24

Attention all SEBECO NP01 customers:

Since 2020, Sebeco have made a series of updates to the NP01-EVO. The updates listed below are Spec-Legal unless otherwise specified. If the update is included as standard on new builds, then the far-right column indicates the inception date, or available as an option.

New Part Description	Old Part Description	New Part Number	Purpose Of Update	Standard as of model year
Billet Uprights	Cast Uprights	NP01-10-057	Stronger upright. Reduces risk of cracking due to contact, excessive rough curb usage, and improves longevity.	2024+
Splitter Brace for Fiberglass Splitter	N/A	NP01-45-045	Prevents porpoising at high speeds	2023+
Endurance Rod Ends	Standard Rod Ends	PR-0173 PR-0177 PR-0178	Stronger rod ends. Reduces risk of cracking due to contact, excessive rough curb usage, and improves longevity.	2023 + (only Rear Top Wishbone)
Endurance Wishbones	Standard Wishbones	NP01-10-005 NP01-10-007 NP01-10-008 NP01-20-005 NP01-20-047 NP01-20-048	Round tubes and fully welded gussets strengthen wishbone. Reduces risk of failure due to contact, excessive rough curb usage, and improves longevity.	2023+
Penske Shocks	MCS Shocks	PS-0085 PS-0086	Penske shocks are the new standard supplier for Sebeco. Both MCS and Penske are spec legal.	2023+
Fuel Discriminator Valve	Standard Check Ball	PF-0190	In endurance racing, the standard ball can get stuck causing fuel to spill out while fuelling. Discriminator Valve eliminates this.	2024+
Thick Cable Stay Brackets	Thin Cable Stay Brackets	NP01-40-040	Reduces risk of cracking and improves longevity.	2021+

EPAS (Electronic Power Steering)	N/A	ANP01-15066	Tuneable steering assist with six settings. Reduces input needed to turn the steering wheel.	Option
Paddle Shift	N/A	ANP01-60098	Steering wheel mounted shift paddles. Allows drivers to change gears without removing hands from the wheel. Auto blips on downshifts.	Option
Billet Alternator Cable Ends	Copper Alternator Cable Ends	NP01-70-017	Reduces risk of cracking due to vibration. Improves longevity.	Option
75 AMP Alternator	50 AMP Alternator	PQQ-0030	Higher output alternator. For cars running headlights.	2024+
150 AMP Alternator	50 AMP Alternator	PQQ-0031	Highest output alternator for car running multiple electrical accessories including: EPAS, Driver cooling, radios, headlights etc.	Option
CV Cooling Ducts	N/A	ANP01-40091	Improves longevity of CV axles.	2025+
Larger Engine Oil Cooler	Standard Engine Oil Cooler	ANP01-52001	Improves engine cooling on hot days or at high altitude.	2023+
Transmission Oil Cooler	N/A	ANP01-80007	Improves transmission cooling on hot days or at high altitude.	Option
Haltech ECU	AEM ECU	PD-0211	Replaces out of production AEM ECU. The Haltech ECU requires a new wiring harness.	2024+
Contactless TPS Sensor & Throttle Body	Contact TPS Sensor & Throttle Body	ANP01-60034	Eliminates TPS sensor wear issue common to endurance racing cars.	2024+
Alcon Calipers	StopTech Calipers	PJ-0194 PJ-0195 PJ-0196 PJ-0197	Alcon is the new supplier of calipers for Sebeco. Both calipers are still spec legal. Alcon calipers require equal sized master cylinders.	2024+
Steering Rack Stop Kit	N/A	ANP01-85032	Evenly aligns the steering rack for easier alignment.	Option
Shift Bracket with Brace	Original Shift Bracket	NP01-30-058	Improves the strength of the shift bracket where the cable mounts to the assembly. Eliminates risk shift bracket failure.	2024+
Alignment Kit	N/A	ANP01-85001	Alignment Kit makes measuring toe easier and more precise when setting up the car.	Option
WRL Forward Facing Light	N/A	ANP01-40142	Required for WRL. Light mounted above the windshield for improved visibility to competitors on track.	Option
Crash Box Update	N/A	ANP01-30170	Additional crush structure for added front end safety. Can be retro fitted to existing cars.	2024+
Non-Spec Legal Upgrades				
Dual Radiator Setup	Single Radiator Setup	ANP01-54019	Helps teams running long format races in high heat or altitude keep the car cool. Requires rear exit exhaust.	Option
Rear-Exit Exhaust	Side-Pod Exhaust	ANP01-60085	Reduces heat inside the car and improved safety while fueling in hot	Option

			pits. Required for endurance racing with fuel stops.	
Carbon Front Splitter	Fiberglass Splitter	ANP01-45003	Improved front downforce.	Option
Front Brake Duct Kit	N/A	ANP01-10019	Brake cooling option for endurance racing cars.	Option
Radiator Blanking Panel Kit	N/A	ANP01-54032	Ease of adjustment and control over engine temperatures in cooler running conditions.	Option

Please contact Sebeco for clarification on any of these updates.
